

I-Caption

by Sound Associates, Inc.

I-Caption® is a state-of-the-art, wireless audio/video aid that provides verbatim closed captions and subtitling on an individual hand-held receiver. Originally designed for live theatrical productions, this fully-automated system displays dialogue, lyrics and sound effects with the efficiency of real-time captioning at a fraction of the cost and manpower.

The Sound Associates *I-Caption*® System combines the power of a Computer Base Station, the convenience of Microsoft® PowerPoint Presentation and the portability of a handheld personal computer to create individual captioning and subtitling in the venue.

First, a "script" of the program is created on individual slides in a PowerPoint Presentation and stored on micro SD flash cards, which are inserted into the R4 Receiver. Automation is achieved through the Sound Associates Computer Base Station, which utilizes midi show control, SMPTE/midi timecode or DMX data to cue the next slide graphic. Slides are continually advanced to run concurrent with the live program or presentation with the precision of real-time captioning while remaining completely automated.

The Sound Associates control station has the capacity for multiple timings allowing the use of captions, audio description and foreign language translation to run simultaneously. Live caption is also available with a windows-based computer and T4 Interface.

Substituting a handheld personal computer for the cumbersome titling displays ensures each end user has perfect visibility of the text. The controlled backlighting of the PDA receiver makes it less intrusive to others.

FEATURES:

- Fully Automated (no technician required)
- Multiple Languages
- Custom Graphics
- Excellent Video Quality
- Highly Reliable
- MP3 audio file of translation or audio description playback
- Easy Set up and Installation

APPLICATIONS:

Ideal for live theatrical productions, movies, museum tours and corporate orientations and training programs

- ❖ Individual captioning for the deaf and hard of hearing
- ❖ Subtitling for foreign language programs
- ❖ Audio channels available to incorporate automated audio description

The *I-Caption*® System is ideal for captioning for the hard of hearing and deaf patrons in live theaters, movies or any circumstance when a program is repeated on numerous occasions. Wildly popular both on Broadway and with their professional national tours, it can be an invaluable tool for breaking down foreign language and accessibility barriers in the corporate environment as well. Using *I-Caption*® in conjunction with orientation and training programs and videos eliminates the need for costly interpreters.

The I-Caption® System also accommodates D-Scriptive (audio description) and Audien® audio translation only offered by Sound Associates, Inc.
